BIENNIAL REPORT
OF THE
SECRETARY OF STATE
OF
COLORADO.

State of Colorado,
Secretary of State's Office,
Denver, November 30, 1896.

TO HIS EXCELLENCY,
ALBERT W. McINTIRE,
GOVERNOR OF COLORADO.

Sir—In conformity with law, I have the honor to submit herewith a report of the transactions of this office for the biennial term commencing December 1, 1894, and ending November 30, 1896.

The business of the office for the past two years has been, from a financial standpoint, a very satisfactory one, as will be seen from the following condensed statement of receipts, showing sources from which received:

BIENNIAL REPORT

DECEMBER 1, 1894, TO NOVEMBER 30, 1896.

Number of Filings	NATURE OF INSTRUMENT	Total Fees Received Therefor
3,408	Articles of incorporation	\$ 226,950 50
2,354	Certified copies.....	6,233 20
909	Notarial oaths and bonds	5,460 00
1,233	Certificates of paid up stock	1,234 25
796	Certificates of impression of seal	796 50
1,940	Stock brands and transfers	2,911 50
1,563	Miscellaneous items.....	3,235 97
	Total	\$ 246,841 92

It will be seen by this report that the receipts from the Secretary of State's office have paid a very large proportion of the running expense of the State Government.

It may be of interest to give here the receipts of this office since the admission of the State:

YEARS	SECRETARY OF STATE	RECEIPTS
1877-1878	William H. Clark	\$ 2,221 25
1879-1880	N. H. Meldrum	10,312 30
1881-1882	N. H. Meldrum	9,465 35
1883-1884	Melvin Edwards.....	9,041 05
1885-1886	Melvin Edwards.....	27,759 75
1887-1888	James Rice.....	70,652 12
1889-1890	James Rice.....	73,969 26
1891-1892	E. J. Eaton.....	126,369 39
1893-1894	Nelson O. McClees.....	95,179 66
1895-1896	A. B. McGaffey.....	246,841 92
	Making a total of	\$ 671,812 05

Making a total of \$671,812.05 collected and turned over to the State Treasurer in the twenty years of its existence. The largest receipts for any one day, during

SECRETARY OF STATE.

the past two years, were \$4,121.75, on February 11, 1896, and the smallest \$3.50, on October 16, 1896.

CORPORATION LAWS.

The filing of incorporation papers furnishes so large a part of the business of this office that the Secretary's attention is naturally more intimately directed to the condition of the law of incorporation than that of any other officer of state. This fact will be sufficient warrant for the suggestions which follow.

Colorado is essentially a mining state. Its interest is, therefore, paramount not only in a wise fostering of the growth and development of this industry, but in protecting it from the discredit certain to follow ambiguous, conflicting or imperfect corporate legislation. The law of incorporation should be so constructed as to encourage the formation of bona fide companies, and at the same time insure the largest measure of protection to the investor in capital stock.

Our incorporation law was, in great measure, enacted in the infancy of the State and at the beginning of its industrial development. This law has, from time to time, been amended, but having been amended by piecemeal, and with not always a due regard to symmetry or the relation of the part to the whole, ambiguities and conflicts quite naturally prevail to a degree that subjects the mining code, so to speak, to the gravest criticism. In certain provisions the law is too restrictive, and in others so loosely constructed as to offer no bar to, if indeed, it does not encourage the perpetration of fraud.

One notable feature, in this connection, to which my attention has been attracted by the transactions of this office, is the original incorporation in other states or foreign countries, of companies organized for doing business in Colorado. It is not necessary to discuss the motive or motives for this procedure. It will be sufficient to say that the idea of advantages gained over domestic incorporations, and of benefits to follow, must be somewhere involved in the transaction. There is good reason for holding that all companies organized for profit, and solely

BIENNIAL REPORT

for the carrying on of business in Colorado, should stand one to another, and as between these companies and the citizens of the state, upon an absolute plane of equality. While it would, perhaps, be impolitic, if not impossible, to legislate against this condition, it would certainly be well that Colorado companies, which, seeking some special advantage, secure original incorporation abroad, should be made to pay a double fee as a penalty for the inequality established by the especial privileges and immunities thus secured.

Under existing law, companies incorporated beyond the State must, before being permitted to do business in Colorado, file with the Secretary of State certified copies of their incorporation papers, paying therefor the same fee required as though they had originally filed in this State. As a means of at least discouraging foreign incorporation of purely Colorado companies, I would suggest the recommendation that the law be so amended that the filing fee for the incorporation papers of foreign companies should be twice that for original filing in this State.

The growing importance of the business of mining and its inevitable tendency towards incorporation, makes it most essential that the legislature should give speedy and comprehensive consideration to the wisdom of a thorough revision and probable amendment of the corporation law. Whether this should be done by committees of that body, or through a commission learned in the law, is a matter for it to determine.

The filing in this office of the articles of incorporation of banking companies organized under our state bank laws, during my term of office, has called my attention to the fact that this law is also weak and deficient, and should be so revised and amended as to afford better protection to depositors and customers. There are twenty-three state banks and seven savings banks now in operation in this state, organized under and subject to our laws. It occurs to me that they should be brought directly under State supervision. There should be a State Bank Examiner provided for in a manner similar

SECRETARY OF STATE.

to the provisions of the federal statutes concerning national banks, and the law in regard to amount of "reserve" should be made very explicit. The same remarks will apply to the law under which trust, deposit and security associations are organized and conducted.

REPORTS OF INCORPORATIONS.

I would also suggest that as long as the State grants certain privileges and immunities to the companies incorporated under its laws, that it should require something besides a fee in return. As it is now, a company files its articles of incorporation, its certificate of paid-up stock and impression of seal, and then it fades from sight. Whether it is in active operation or whether its career ended with the issue of its last share of stock, this office has no means of knowing. Anxious investors in stocks write to the Secretary of State from the four corners of the earth; they want to know all sorts of things, and the secretary is not in a position to answer their queries.

I would suggest that all companies incorporated under the laws of this State, or that are incorporated under the laws of other states or countries, and filed in this State, be required to make an annual report to the Secretary of State, giving names of their officers and directors, addresses of same, location and full description of their property or properties, whether in active operation or not, whether properties, if mines, are patented or not, amount of work done, and such other information showing physical condition of properties and the financial condition of the companies as may be deemed necessary, and that a penalty be provided for failure to comply therewith.

If this be done some idea can be had as to what companies now on our books were organized for immediate pecuniary profit and nothing else, and what companies are legitimate business propositions, and the enquiring public can be answered accordingly. You thus protect the good and weed out the bad, and afford the public some protection against "paper" companies formed

BIENNIAL REPORT

for the sole purpose of wilcat speculation. I realize that it is difficult to draw the line between the good and the bad, but if any means can be devised looking to the weeding out, or of designating the fakes and frauds which are organized for public plunder, and informing the public as to the true character of the property of the companies, it should be done before a permanent injury is worked to our mining interests and the good name of our State forever tarnished by over-capitalized and fraudulent stock companies.

DISSOLUTION.

We have on our books on this date 16,752 companies organized under the laws of this State, and 1,420 companies organized under the laws of other states, territories, countries, etc., but filed in this office for the purpose of doing business in this State; making a total of 18,172 companies now on our books. Of the 16,752 companies organized under the laws of this State, 7,352 are mining companies, 1,742 are ditch and water companies, and 7,658 are miscellaneous corporations such as townsite companies, railroad, mercantile companies, land and investment companies, toll and wagon roads, coal companies, benevolent and social organizations, hotel companies, cattle companies, breweries, telephone companies, banks, paving companies, ferry companies, water, heat and gas companies, clubs, manufacturing companies, boards of trade, stock exchanges, church organizations, etc.; in fact, any and all corporations not included under the heads "Mining Companies" and "Ditch and Water Companies."

Many of these companies have never had an active existence. Some have never had a meeting of either stockholders or directors. Some were formed prior to the passage of the present law raising the fees from the old to the present amounts, for speculative purposes in hopes of being able to sell out at a profit after fees were raised. Some that were started honestly and with good purpose have either, from failure to realize on their expectations or some other (to them) good and sufficient reason, sunk

SECRETARY OF STATE.

into a state of "innocuous desuetude;" but they still appear upon our records and encumber our indices.

I would recommend that in connection with the report suggested to be made yearly to the Secretary of State, than a plan be devised for weeding out these defunct and moribund companies, and thus simplify the indices. This can be done by imposing a penalty for not making proper returns within a specified time, and directing the Secretary of State to strike them from the indices and records, after proper notice has been given to the companies, by advertisement made in the official State paper, that none may be wronged through some officer's neglect. Means should also be provided for reinstatement in case of any error or mistake, or if good cause be shown why same should be done.

NAMES OF CORPORATIONS.

Some more stringent law should be devised and enacted regarding the adoption of names by incorporating companies. The extreme similarity of names admissible under present statutory provisions can easily be made to serve the purposes of unscrupulous and dishonest stock jobbing operators. Legitimate companies which have gained an enviable reputation upon merit may be sorely injured by the swindling operations of some company bearing a similar name—perhaps organized purposely to trade upon the reputation of the other. Unsuspecting persons are led to invest in worthless stocks, thinking that they are putting their money into the legitimate concern. To illustrate what a close similarity of titles may be had under the present law, it need only be stated that it has been held in one of the courts of this state that the names "The Highland Reservoir and Ditch Company" and "The Highland Ditch and Reservoir Company" were distinct and separate titles. A change of a single word, or a change in the arrangement of words is all that is at present required.

An exactly similar name may be secured by incorporating under the laws of some other state and then filing in Colorado. Under existing laws there is no pos-

BIENNIAL REPORT

sible way to prevent such a thing. Yet this and all other similar loopholes for chicanery should be rendered impossible, by some means. My former recommendation that foreign corporations be charged a double fee for filing in this state would in a measure mitigate the latter evil, but could not entirely prevent it.

Our law in regard to names of corporations reads as follows: "No certificate shall be filed or received for two corporations bearing the same name." I would suggest that the following be added thereto: "Or one so nearly similar to the name or title of any other corporation, foreign or domestic, now on file, as to lead to uncertainty or confusion." Make the Secretary of State the judge as to what would "lead to uncertainty or confusion," and let his decision be final.

I would strongly urge that legislative enactment be had in this respect, as it is a growing evil.

INCORPORATION FEES.

The fee for filing articles of incorporation under the existing law is ten cents for each one thousand dollars of capital stock, with a minimum fee of ten dollars. The cheapness with which a company with a long and high sounding name and a large and imposing issue of capital stock can be foisted upon a guileless and unsuspecting public, is no doubt responsible for the immense amount of very handsomely printed but totally worthless stock that is sold yearly, and which is usually a total loss to the investor.

I would recommend that the filing fee be increased to twenty cents for each one thousand dollars of capital stock, with a minimum fee of twenty-five dollars, since the quality rather than the quantity of incorporated companies is of first interest to the state. The wisdom of the suggested change in the law will, it is believed, recommend itself most favorably to the Legislature.

It may be well, also, to suggest, in passing, that other fees of this office stand in need of revision.

SECRETARY OF STATE.

BUREAU OF LABOR.

The Bureau of Labor Statistics is under the direct supervision of the Secretary of State, who appoints the deputy commissioner. The Bureau has for the past two years been under the charge of William H. Klett, who has given the duties of the office careful and conscientious attention. For the first time in eight years an attempt has been made to comply with the law in its provisions regarding the collection of labor statistics in Colorado, and some very interesting and valuable matter is presented in his report. In this connection, however, I desire to call favorable attention to the several recommendations made by him, especially to that in reference to "County Statisticians." Some such law is absolutely necessary in order to make the work of the various State Boards and institutions of real value to the public. The scheme suggested appears to be entirely practical and feasible, and would entail little or no increase in the total amount now expended by these various branches of the state government, while it would undoubtedly increase their efficiency an hundred-fold. The services of the County Statistician might also be made of local value to the county in other ways.

The success of the Commissioner of Labor in rendering assistance in the collection of wages has been a source of great profit to the laboring classes, and his efforts as mediator in all labor difficulties have been uniformly satisfactory and nearly always successful. The one notable exception has been the strike at Leadville, where his every attempt to secure an adjustment of the differences between employers and employes by means of arbitration and otherwise has proved futile.

The department is accomplishing much good, and should be rendered all possible assistance by the legislative and executive branches of the government.

BRAND DEPARTMENT.

There are on record in this office 19,644 live stock brands—12,593 composed of letters of the alphabet, 2,275 composed of numerals and 4,776 of characters and sym-

BIENNIAL REPORT

bols. Of these, 1,744 have been added during the past two years. Many of these brands are not in use, companies owning them having gone out of existence and individuals having died or retired from business. Considering the difficulty—in fact, almost impossibility—of at this time securing a small, simple stock brand, it would seem as though some means should be devised of weeding out the unused brands and allowing the Secretary of State to allot them to others. That would be a very desirable thing to do. As it is now, the Secretary, even though he has positive proof that a brand is not being used, has no authority so to do, nor would he dare to allow any one else to exercise such authority with his sanction. All two-letter or figure brands placed horizontally are on record. The only way that a small or simple brand can now be issued is by having one or both of the letters “lazy,” or in some position besides the upright or usual one.

The prevailing opinion seems to be that the demand for brands is decreasing. The contrary is the truth. Over seven hundred more brands have been issued during my term of office than during that of my predecessor. This indicates that as large cattle companies go out of business the farmer takes their place, and we have instead of one large company many small owners, and they each want a brand of their own. They wish it as small and as simple as possible, that the hide may not be injured for sale, and it is impossible to fill the demand. If, as I said before, a law could be devised that would throw open for use the brands that have gone out of use, it would in a great measure satisfy this want.

The fees of this Department more than pay its expenses.

ENGROSSING AND ENROLLING.

I would respectfully but most earnestly call the attention of the General Assembly to the fact that the present manner of engrossing the bills and enrolling the laws is very faulty, and does not result in the highest class of workmanship. Clerks find places upon these committees who are totally and absolutely incompetent

SECRETARY OF STATE.

and unfitted for the positions. The result is that the enrolled bill, as signed by the Governor and received by the Secretary of State, is full of bad spelling and worse punctuation. The Secretary of State has no authority to correct an error, however palpable it may be, and of course prints it in the session laws as he receives it, bad spelling, worse punctuation, etc., and so it goes to the public. A copy is sent to the governor of each state, and to all State, district and county officers. Then the trouble begins, and pleasant little notices like the following appear in the newspapers:

"As a piece of book work the laws of the Tenth General Assembly is a disgrace to the state. Take chapter 104 as an example. It covers less than three pages, yet eighty-seven typographical errors can be found in that chapter alone."

These laws are, of course, read and studied in other states, and being of necessity printed as they are enrolled, they cannot but discredit the efficiency of our common school system. Chapter 104 is not the only one subject to criticism. An examination will show that there are others. It requires the expenditure of a good many hundreds of dollars (at the last session it cost \$1,086.92 per bill) and of much time and effort to pass a bill through the General Assembly, and yet it can be made totally inoperative through a misplaced comma. This being the case, an ordinary observance of business principles would suggest that the chance for errors be reduced to the minimum. This can only be done by the exercise of the greatest caution, and the application of the most rigid business methods in the selection by the legislators of those employes having to do with the engrossing and enrolling of bills.

No member should give his vote to any candidate for these appointments until he has satisfied himself of the competency, in the highest degree, of the applicant. The work could be done much more speedily, accurately and legibly and mistakes and errors could be more readily detected if done with typewriting machines and the saving in expense would be a very large one. While I am loath to suggest the recommendation of any method

BIENNIAL REPORT

of procedure upon the part of a coördinate branch of the government, the evils, widespread, never-ending and oft-times most serious, which flow from seemingly inconsequential sins of both omission and commission in the engrossing and enrolling of bills, are so often brought to the notice of this office, that no mere question of propriety should, perhaps, be permitted to intervene.

EMERGENCY CLAUSE.

I would respectfully repeat the suggestion of my immediate predecessor in reference to printing in the official State paper a copy of each bill (excepting appropriations) passed by the General Assembly with the emergency clause attached. These laws become operative immediately upon being signed by the Governor, and are not procurable by the public until printed in the session laws some months after their passage. I believe that every attorney in the State will endorse this suggestion, as the importance of an immediate acquaintance with these laws by the judges and practicing attorneys is duly appreciated by them.

OUR ELECTION LAW.

The election law, as at present construed, makes of the office of Secretary of State a kind of junior court, to hear and decide upon objections to the filing and printing of nominations, tickets, etc. These quasi judicial functions and responsibilities, thus imposed, are repugnant to the character, and are in no just or wise sense legitimate to the business of this office. It should be the duty of the Secretary of State to file any certificate "which is in apparent conformity," or better, "substantial conformity," without question. With this act his duty in this behalf should end, unless otherwise directed by some court of competent jurisdiction. If any be aggrieved at the manner of the discharge of this simple duty, let them appeal to the court and secure, if they can, an order upon the Secretary of State directing him what to do in the particular matter in controversy. No judicial function, in any manner to be avoided, should be imposed upon a purely ministerial officer.

SECRETARY OF STATE.

I would also most emphatically recommend that the emblem be abolished, and that nothing appear on the ballot save and except the name of the candidate with the office to which he is nominated and the party that he represents. Since the emblem is but a symbol of ignorance, the quicker this is done the better.

The Secretary of State has collected sample ballots from nearly every state in the Union, and these he will be pleased to submit for the inspection of anyone desiring to institute comparisons with a view to simplifying and improving our present form of ballot. The enormous cost of these ballots, and the opportunities they afford for deceiving and confusing the voter, are defects deserving the most careful consideration.

I would also call attention to the fact that our election laws need alteration in harmony with the revised statutes of the United States. Section 4 of article II. of the Constitution of the United States, in reference to electors for President and Vice-President, reads as follows:

"The Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States."

The statutes of Colorado (section 65, chapter XXXIV., G. S.) provide that:

"The Electors of President and Vice-President of the United States shall convene at the capital of the State, on the first Wednesday of December, next after their election, at the hour of twelve o'clock at noon of that day."

This was the law of the United States at the time of the adoption of our state constitution and the passage of the above act. The law was changed, however, by act of Congress of February 3, 1887, as follows:

"The electors of each state shall meet and give their votes on the second Monday in January next following their appointment, at such place in each state as the legislature of such state shall direct."

There is here a conflict, of course inadvertent, which should be corrected by amendment, since in this matter, under the provisions of the Federal Constitution, United States law takes precedence of state law. Section 64,

BIENNIAL REPORT

chapter XXXIV., G. S., should also be amended in accord with any amendment that may be made to section 65.

I would also call attention to the fact that the United States statutes respecting the transmission of the electoral votes for President and Vice-President of the United States was amended by act of Congress on October 19, 1888, to correspond with the changes made in February, 1887.

It may be suggested that the election of a President and Vice-President, being a function of the highest importance and fraught with the gravest possibilities, the legislature might in its wisdom examine into the entire law providing for an Electoral College, and make such additions or amendments thereto as may be necessary to make it in complete consonance with the constitution and laws of the United States.

CONSTITUTIONAL AMENDMENT.

The proposed amendment to section 3, article IX., of the State Constitution, providing for the funding of the over-issue of State warrants, was published for a period of three months preceding the general election in one or more representative papers in each county, as the law directs. The list of papers publishing the proposed amendment, their place of publication and the amount due each for the service, is published elsewhere in this report.

The total vote cast on this amendment was 65,117. The total vote cast for presidential electors was 189,818. The question submitted was a most important one as directly affecting the interests of all the people of the state, and especially in its relation to our school system. The fact of its submission and the advisability of its adoption were matters widely discussed in the public press, and there was supporting it, throughout the state, a well organized force composed largely of those interested in educational matters. Notwithstanding all this,

SECRETARY OF STATE.

but $34 \frac{3}{10}$ per cent. of the total number voting interested themselves sufficiently to vote at all upon the question.

Two years ago, after the State had expended over \$26,000 for advertising for a space of three months in one hundred and forty newspapers, and after a vigorous agitation both for and against the adoption of a similar proposed amendment, but $43 \frac{2}{10}$ per cent. of electors voting for Governor took enough interest in the matter to vote upon it either one way or the other. The amendment at that time was published in one or more papers in every county in the State, the total number including thirty dailies and one hundred and ten weeklies. The matter was also editorially discussed in nearly every paper published in Colorado, besides being fully presented by speakers at political meetings during the campaign. Surely no more thorough presentation of the question to the people could possibly have been made, and yet scarcely more than one-third of the voters took the trouble to express an opinion of any kind at the polls.

The significance of these facts lies not in the adoption or rejection of the proposed amendment. They are important, however, in their bearing upon another question which has of late years been receiving much public consideration. I refer to the "Initiative and Referendum" idea. Illustrations bearing upon this theory of law-making are always interesting and at this time especially valuable, but the results so far attained in Colorado would not appear to be especially encouraging. If not more than a third of the voters of the State can be interested in so important a matter as that embraced by these proposed amendments, the important question naturally arises as to what might reasonably be expected under a law providing for a similar reference to the people of all kinds of general legislation.

NOTARIES PUBLIC.

There were commissioned in this state during the past two years 879 notaries public. There are of these officials, 1,680 in commission in the state to-day.

BIENNIAL REPORT

The notary public system of this state, as at present provided and operated, opens wide the door to the practice of fraud and rascality, and is a constant source of scandal. This statement, harsh as it may appear, will, upon examination of the records of our courts, be fully justified. The existing conditions, in my judgment—a judgment based upon some years of official experience, bringing me into close relation with notarial work—demand most prompt and rigorous treatment at the hands of the legislature.

The carelessness—I might say even criminal carelessness—of the work done by notaries public is being constantly and most forcibly brought to the notice of the Secretary of State. Papers are by them illegally drawn and illegibly written; acknowledgments are faultily prepared, the spelling is poor, the punctuation is worse, and an absolute ignorance of the law is most frequently shown. Scarcely a week passes that papers, affecting large pecuniary and great personal interests, are not filed which are without any force whatever, made so through the ignorance or carelessness, or both, of some notary public. It is clear to me that legislation should be had requiring qualifications for this most important (in its general relation to the public) office other than that of being able to read and write. Certainly it should be required that they be able to read and write understandingly and correctly.

To the end that a higher order of ability may be enlisted, and a greater degree of excellence in the performance of the important duties incident to the office, the appointment should carry with it greater dignity and be made remunerative. The number of notaries should be limited, and, at least in cities, apportioned approximately to the population. Perhaps with a limitation upon the number, the present schedule of fees might be considered sufficiently remunerative to justify a proper degree of knowledge as a requisite to appointment; if not, the fees should be revised and increased. The present most evident and lamentable lack of efficiency, speak-

SECRETARY OF STATE.

ing generally, in the notarial service, can in no wise be charged against the appointing power, but is due to the weakness and the looseness of the law providing for appointment. Greater dignity should attend this appointment. The appointment itself should be given greater importance. This might be done, as obtains in some states, through an appointment by the governor, and confirmation by the senate.

Whether this, the present or some other method of appointment be provided, a certificate of some official, competent to form an opinion as to the proper degree of efficiency (perhaps a judge of the District Court for the district within which the applicant resides) should be required as a prerequisite to the consideration for appointment by the appointing power. The penal sum of the notarial bond should be increased, and subject to approval by some responsible officer, probably of a court, so situated that he may personally know, or be able by proper evidence to judge of the quality and responsibility of the surety offered. In no event should a notary public be appointed until he has shown himself competent to draft an ordinary bill of sale and such other simple forms as appertain to the duties of his office, and who could be held responsible under his bond for errors and mistakes resulting in pecuniary loss to parties employing him.

In view of the foregoing, I cannot too urgently suggest the recommendation to the legislature of immediate and most thorough investigation and treatment of this subject.

OFFICERS' REPORTS.

I would respectfully recommend that the attention of the General Assembly be called to the number of copies of the reports of the various state officials, elective and appointive, permitted to be published under the law, and will briefly refer to what I deem to be the shortcomings of the statutes. Under the present law any elected state office (except Superintendent of Public Instruction) can publish 1,000 copies of his or her report

BIENNIAL REPORT

with no limit as to number of pages. The Superintendent of Public Instruction and the State Engineer can publish only 500 copies each of their reports, with no limit as to number of pages. All other officials are limited to 250 copies of 100 pages each.

This last clause applies to the Labor Commissioner and the Commissioner of Mines. Both of these bureaus of our state government were organized in the interest of and for the purpose of supplying information to two large and important classes of our citizens, the general laborer and the miner, as well as the wider public. These are important factors in our state, and yet after both bureaus have been formed at heavy expense by the taxpayers they are rendered practically useless, so far as spreading the information collected is concerned, by the limitation as to the number of copies and size of their reports. Requests come from all quarters of the globe for these reports. The demand from foreign countries is very large and cannot be supplied, thus losing an opportunity to advertise our state and its resources which should not be overlooked. Every labor organization in the United States asks for a copy of the Labor Commissioner's report, and should be supplied.

I would recommend that the limitation as to the number of pages of both of these reports be removed and that they be allowed to print three thousand copies or less of each. The Superintendent of Public Instruction and State Engineer are not limited as to number of pages in their reports, but to anywhere near supply the demand they should be allowed to print at least three thousand copies of each.

LETTING OF CONTRACTS.

The law requires that the Governor, Secretary of State and State Treasurer shall on or before the third Monday in April of each year, after due advertisement, receive bids and designate some daily newspaper published in the city of Denver in which shall be published during the year following, all legal notices and advertisements of the several departments of state, including

SECRETARY OF STATE.

the State Land Board and the Superintendent of Insurance. This was done according to law, and The Denver Evening Times was, on the 20th day of April, A. D. 1896, awarded the contract for publishing all the legal notices and advertisements of the state at thirty (30) cents per folio for the first insertion and twenty (20) cents per folio for each subsequent insertion; contract to expire April 19, 1897.

The law also provides that the Secretary of State shall, on the first day of August immediately preceding each biennial session of the General Assembly, advertise for thirty days in two daily papers in the city of Denver, inviting sealed proposals for doing all printing and binding required by the General Assembly and by the several state departments for the two succeeding years. The law requires the bids to be opened by the Secretary of State in the presence of the State Treasurer and Attorney General, or in absence of either, in the presence of the Governor. The law was duly complied with and a contract was let to The Smith-Brooks Printing Company, to expire on the first day of December, A. D. 1898.

The Secretary of State is also required by law to advertise fifty (50) days immediately preceding each regular session of the General Assembly for bids to provide the necessary furniture, stationery, fuel, light and other articles required by the various departments of state for the two years succeeding the first day of January next after such advertisement. The schedule in use heretofore for this purpose was found to be faulty and insufficient, so a new schedule was carefully prepared, which it is believed includes nearly if not all articles used in the several departments of state and by the General Assembly. This will result in a considerable saving to the state, as it will not be necessary to go outside of the contract for but very few articles, if any. This advertisement is now being made according to law and bids will be received on December 18, 1896, and opened in the presence of the Attorney General and the State

BIENNIAL REPORT

Treasurer, or in the absence of either of them in the presence of the Governor, and contract let to the lowest responsible bidder.

CARE OF STATE PAPERS.

The Secretary of State is the custodian of all State papers. The original or certified articles of incorporation of every company doing business under the laws of this State are in his care. The original copy of every law on our Statute books is turned over to him for safe keeping. The original Senate and House journal of each session of the General Assembly is kept by him. He is also custodian of the bonds of the various State officials. These papers, documents, etc., are of priceless value, and are of such a nature that once defaced or destroyed it would be impossible to replace them. They are frequently used as evidence in the courts in cases of the greatest importance, often involving not only the personal liberty of our citizens but in many cases the issue of life or death. The importance and value of these papers warrants some expense and care in their safe keeping.

The Secretary of State is provided with ample vault room to last for many years. The vaults are believed to be absolutely fire proof. In them are stored these valuable papers in old wooden cases, in wooden boxes or on wooden shelves, all open to the air and dust and affording an abiding place for mice and rats. The moth enters in and corrupts, and the result is that some of the papers, especially the very old ones, are in a condition of preservation far removed from that in which they should be. I would recommend that the General Assembly make immediate provision for fitting these vaults with the latest and most modern, dust, mice and air-proof vault fixtures.

INDICES.

The indices now in use in this office have become old and worn through much handling. Many leaves are loose, bindings are broken, and they should be re-copied

SECRETARY OF STATE.

at once, and a sum should be appropriated for this purpose. I would suggest that when this is done the large and cumbersome books now in use be abolished, and that nothing larger than a six-quire book be used. The index should also be so divided that there shall be not less than four such books used in place of each of the present indices. This will greatly facilitate the work of the office, and be much better for attorneys and others who have occasion to examine or refer to the records thereof.

BOOKS AND ACCOUNTS.

Upon assuming the duties of this office, I at once opened a complete set of books and accounts, including journal and ledger accounts with each of the various funds appropriated by the General Assembly in connection with the departments doing business with the Secretary of State, and under his control. I also opened a cash book showing each day's receipts, itemized, during my administration. The source of all cash received is here plainly indicated in such a manner that it is but the work of a few moments to ascertain or verify the payment of any fee received during the two years. A copy of every voucher issued by me is also on file in a book kept for that purpose, and fully indexed, making reference thereto a simple and easy matter. All letters received have also been filed and indexed, and all correspondence of the office has been carefully preserved in indexed letter-files. The filing of all other papers and documents has also been carefully systematized, and a complete investigation of the affairs of the office can now be made at little expenditure of time and effort.

OLD RECORDS.

Upon assuming the duties of my office I found over one hundred boxes of old records, letters, reports and books, which had accumulated since the organization of the State and which were piled up promiscuously in the basement of the Capitol. These have been sorted and arranged, and are now on file in the vaults of this office.

BIENNIAL REPORT

STATE BOARDS.

The Secretary of State is ex-officio a member of the State Board of Land Commissioners, the State Board of Education, the State Board of Equalization and the State Board of Canvassers. Considering the large amount of business demanding his attention in his own office, it is scarcely possible that he should give these boards such time and consideration as they deserve, and he is often compelled to perform the duties pertaining thereto more or less perfunctorily. The Board of Equalization and the Board of Land Commissioners especially encroach upon his time and attention, but as all these duties are constitutional, no change, however desirable, can be made by the General Assembly.

APPROPRIATIONS.

It may be well, before stating what amounts, in my opinion, should be appropriated for the use of the Secretary of State during the next two years, to call attention to what has been allowed him in the past. From these figures, taking into consideration the increase of business, may be formed some idea as to what will be needed for the coming two years. It is not expected that the office will do the business in the next two years that it has in the past two, yet it may; and the Secretary's appropriation should not be put at such a low figure that in case of an unexpected increase of business he may not be able to handle it with credit to himself and satisfaction to those having business with the office.

The public demand from an official prompt and intelligent service, and he should be in a position to grant it. My rule during the past two years has been to never leave the office at night with a letter unanswered. The delay of a day, or even a mail, means much to a business man. If the Secretary is hampered by an insufficient or niggardly appropriation his reputation as a competent official must suffer and the public have just ground for complaint. Economy is a word that comes readily from the tongue of many who are new to public business and

SECRETARY OF STATE.

who have no conception of what is expected from a public official or the needs of a public office. Economy is one thing and prodigality is another. A proper medium is what should be aimed at.

The fact that the files of this office have been increased during the past two years by over 5,400 documents appertaining to incorporated companies, will of itself largely increase the work of the office. The salaries of the Secretary, the Deputy Secretary and the Printing Clerk are fixed by Statute, and it is unnecessary to advert to them. The first item for consideration is "Secretary of State's Clerk Fund," for which appropriations in the past have been as follows:

1889 and 1890, for both years.....	\$ 8,000 00
1891 and 1892, for both years.....	8,000 00
1893 and 1894, for both years.....	10,000 00
1895 and 1896, for both years.....	10,000 00

I would recommend that this be increased to \$11,200.

The next item is "Incidental Expense Executive and Judicial Departments," and appropriations for this have been as follows:

1889 and 1890, for both years.....	\$40,000 00
1891 and 1892, for both years.....	35,000 00
1893 and 1894, for both years.....	27,000 00
1895 and 1896, for both years.....	25,000 00

I would recommend that this be increased to at least \$30,000.

The next item is "Printing, Executive and Judicial," and appropriations for this have been as follows:

1889 and 1890, for both years.....	\$25,000 00
1891 and 1892, for both years.....	30,000 00
1893 and 1894, for both years.....	25,000 00
1895 and 1896, for both years.....	25,000 00

The amounts appropriated in this fund are inadequate, and should be increased. From it is furnished

BIENNIAL REPORT

the printing for all the State offices, the Supreme Court and Court of Appeals reports, School Laws, Election Laws, all State advertising, blank books, Treasurer's quarterly reports, and such other printing as may be needed by all the State offices during the next two years. With a much larger business and more departments to provide for than in 1891 and 1892, this fund has been decreased. I would recommend that for the next two years it be at least \$35,000, and every dollar of the amount will be needed.

The next item is "Incidental Expense, Secretary of State," and appropriations for this have been (including translation of laws and preparing House and Senate journals) as follows:

1889 and 1890, for both years.....	\$ 4,000 00
1891 and 1892, for both years.....	13,000 00
1893 and 1894, for both years.....	10,000 00
1895 and 1896, for both years.....	10,000 00

I would recommend that the sum of \$10,000 be appropriated for the ensuing two years.

The salary of the Deputy Commissioner of Labor, who is appointed by the Secretary of State, is fixed by Statute at \$1,800 per year. To properly conduct his office and fill the requirements of the law he should be provided with an expense fund sufficient to enable him to employ a capable clerk and to defray his own necessary traveling expenses. The Statutes set out thirteen different subjects that he must embrace in his report and upon which he must gather and present statistics. Information on many of these subjects he can gain only by personal visitation and investigation. Writing to employer or employé has, after patient and repeated trial, been found to be totally useless. They will not answer repeated questions, even when it would require but the smallest expenditure of time or labor. The Labor Commissioner is also required by law to act, when properly requested, as mediator between employer and employé, and if possible prevent strikes, etc., and must "visit the

SECRETARY OF STATE.

place of such disturbance." To do this, he must have something beside a salary of \$150 per month. The appropriations for this Department, in addition to the \$1,800 salary allowed the commissioner by law, have been as follows:

1889 and 1890, for both years.....	\$ 2,500 00
1891 and 1892, for both years.....	3,000 00
1893 and 1894, for both years.....	3,000 00
1895 and 1896, for both years.....	3,000 00

To procure a clerk who is capable of handling and putting into proper shape the statistics that he may collect, and who can properly conduct his office during his absence, will cost him at least \$100 per month, or \$2,400 for the two years, leaving him \$300 per year for traveling expenses, hotel bills, etc. This is not enough. He should have double the amount, and I would recommend that this appropriation be made \$3,600 for the coming two years. This is the only department of state directly relating to or bearing upon labor interests, and if not hampered by insufficient legislation or lack of appropriation, can be made of incalculable value, not only to the workingman, but to the public at large as well. Here is an opportunity for a practical demonstration of the interest taken in the cause of labor by the lawmakers of the State, and it should not be overlooked or rejected.

I would also recommend that the sum of \$1,000, or such part thereof as may be necessary, be appropriated for the purpose of re-copying and re-arranging the old indices now in use in the Secretary's office. This work is absolutely necessary and should be done at once.

Summarized, the appropriations recommended for the Secretary of State's Department, are as follows:

Secretary of State's Salary.....	\$ 6,000 00
Deputy Secretary of State's Salary.....	5,000 00
Secretary of State's Clerk Fund.....	11,200 00
Printing Clerk's Salary.....	3,000 00
Incidental Expense, Executive and Judicial	30,000 00
Printing, Executive and Judicial.....	35,000 00

BIENNIAL REPORT

Incidental Expense, Secretary of State.....	10,000 00
Deputy Commissioner of Labor's Salary....	3,600 00
Deputy Commissioner of Labor's Expense Fund	3,600 00
For re-copying and re-arranging indices....	1,000 00

IN CONCLUSION.

In conclusion, allow me to express my sincere appreciation of the consideration shown me in the discharge of my duties as Secretary of State by your Excellency and by other officers of State, both executive and judicial. Without this, I feel that my administration must necessarily have been less efficient and its requirements certainly more onerous to me.

I also desire, as a fully merited consideration, to commend the faithful and efficient service rendered me by my able deputy, Mr. C. C. Robinson, and by all who have been under him in the office. Their relations with the public whom they have been called upon to serve have been universally cordial, and I flatter myself that whatever may have been my own shortcomings I have no apologies of any kind to make on their behalf.

Yours very respectfully,

A. B. McGAFFEY,
Secretary of State.

SECRETARY OF STATE.
